For Driveways, Low-Spot Repairs, Livestock Loafing Areas, Ditch Backfill, On-Farm Slag Pads.

"I had a constant problem with potholes and low spots in my farm lanes. It was too expensive to buy gravel to fix'em. So, I used slag to fill'em in and level the roadways. It worked great – if I knew I could have saved this much money I'd have been using slag aggregates years ago!"

— Ephraim B.
Lancaster PA

Steel Slag Aggregates are:

- 🔧 Locally supplied
- 🔧 Harder than Limestone
- 🔧 Dark Grey color
- 🔧 Economical

"My neighbor suggested we use slag to save money on the ditch back-fill – I was really surprised at how inexpensive it was, and it has really performed well to this day." — Sam P. Middletown PA
